WASHINGTON SILVER DOLLAR

1976. 1796. Washington Dollar size Medal, Snowden 43, Baker 33 (Identical specimen illustrated). Weight 361 grains. Specific Gravity 10.5, Diameter 1½" Hole above head. Obv. Good; Rev. Fine. Bust of Washington facing left, inscription "Washington President 1796." Rev: Eagle and inscription. Similar in all respects to the 1792 Piece both of which were by Getz. This identical piece was listed by Snowden in the Mint collection, supposedly presented by H. Drumheller of Schuylkill Co., Pa., and listed as unique. However, when Baker in the course of research for his book, contacted the Mint, he discovered that the piece had only been loaned to the Mint. Mr. Baker was unable to locate this specimen and its whereabouts remained unknown and obscure until the summer of 1960, at which time it was purchased by a Midwest dealer who in turn has consigned it for this sale. Extensive research was done by George J. Fuld and Eric P. Newman and reported in the Numismatic Scrapbook, November 1961, Page 2882. We are proud to present this unique and extremely rare early museum piece. Certainly no rarer coin exists in the United States series and would not be surprised to see it bring close to \$10,000.00.
